

## Third-Party Web-sites

### Note:

Many of these DST updates are due to imbedded Java run time environments in those products. Some software providers offer a Java time zone update tool for updating only the Java environments rather than applying product refreshes, updates, or fix-packs. In these cases, either the applicable product update must be applied, or the Java time zone update tool must be run.

- IBM: <http://www.ibm.com/support/alerts/daylightsavingstimealert.html>
  - Follow links to information for zOS, AIX, DB2, WebSphere, MQ Series, etc.
  - Also identify fixes to any IBM-provided Java environments.
- Microsoft : <http://www.microsoft.com/windows/timezone/dst2007.msp>
  - Follow links to Windows operating systems, SQL Server Notification Services.
